

Please be sure to break-in your S30 speakers thoroughly, 150 to 200 hours, before making any critical assessments of their performance. Their treble is somewhat edgy as shipped from the factory, but this will tame down dramatically as the tweeters (and our internal wire, capacitor, and jumper upgrades) break-in. After 150-200 hours of continuous play, you'll hear the true, nuanced delicacy and amazing bass punch this fine speaker offers.
